
CRYSTAL VINYL POOLS

Premium line of pools:
unparalleled durability and a distinctive design.

EUROPOOL WHO WE ARE

We are a Polish company that has been fulfilling dreams of the perfect relaxation zone since 2007.

Europool manufactures vinyl ester and polypropylene pools, which are characterized by the highest quality due to continuous production technology improvement. We provide comprehensive services, from design, through transportation, installation, pool equipment, to servicing. The pursuit of meeting the expectations of even the most demanding customers led to the creation of the Europool Spa line, which expanded our offer to include spa tubs.

WHAT DO YOU DREAM ABOUT?

CRYSTAL VINYL POOLS PRODUCTION FOR THE MOST DEMANDING CLIENTELE

The production of Crystal Vinyl Pools is a multi-stage process designed to meet the highest standards. Thanks to innovative solutions, we have achieved exceptional durability, strength, and unparalleled design.

Vinylester pools are the flagship products of our company. As part of our continuous improvement efforts, we decided to develop a product unlike anything on the market. This led to the creation of Crystal Vinyl Pools, designed to meet the highest expectations of our customers. Months of testing and experience have led us to develop the Crystal Vinyl-Coat layer, allowing us to achieve the highest quality product in the pool market. Thanks to the use of innovative materials and unique production technology, these pools are stronger and more durable than traditional basins, and their appearance is incomparable to anything else.

20 YEARS OF OSMOSIS WARRANTY

We provide a guarantee of pool durability against cracks, bubbles, and discoloration resulting from osmotic phenomena.

INNOVATIVE EINFORCED CONSTRUCTION

Crystal Vinyl Pools are even 30% heavier than traditional basins. This is a sign of their increased durability, resulting from the reinforced construction.

UNIQUE POOLS DESIGN

Crystal Vinyl Pools are available in a variety of colors, and the glitter particles give the pool a sparkling effect.

OVER 15 YEARS OF EXPERIENCE

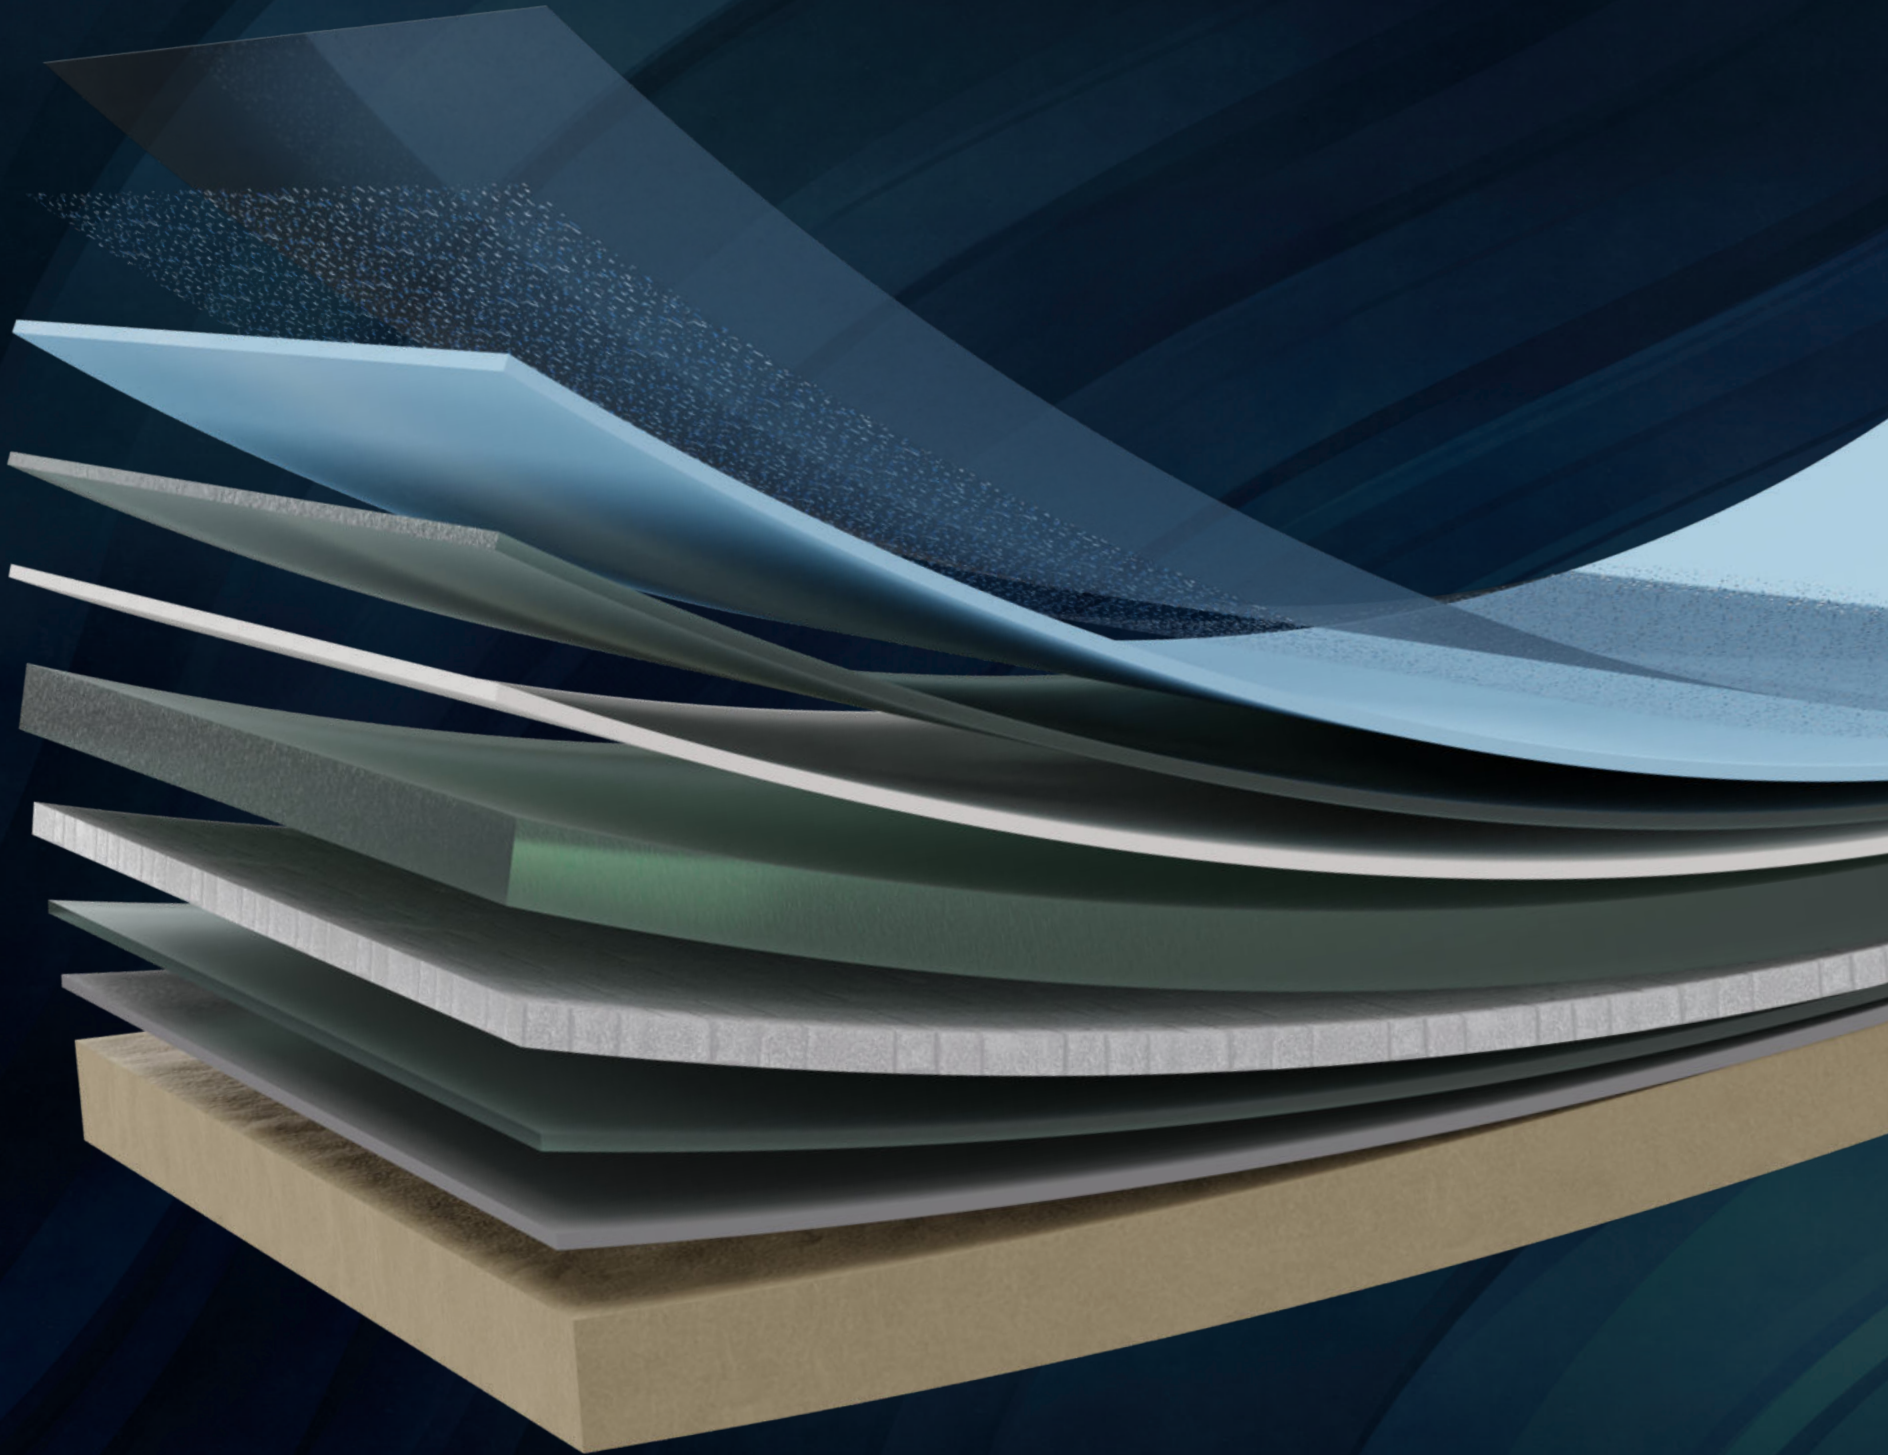

The production technology requires experience and precision. Our employees continually improve the quality and pay attention to the smallest details.

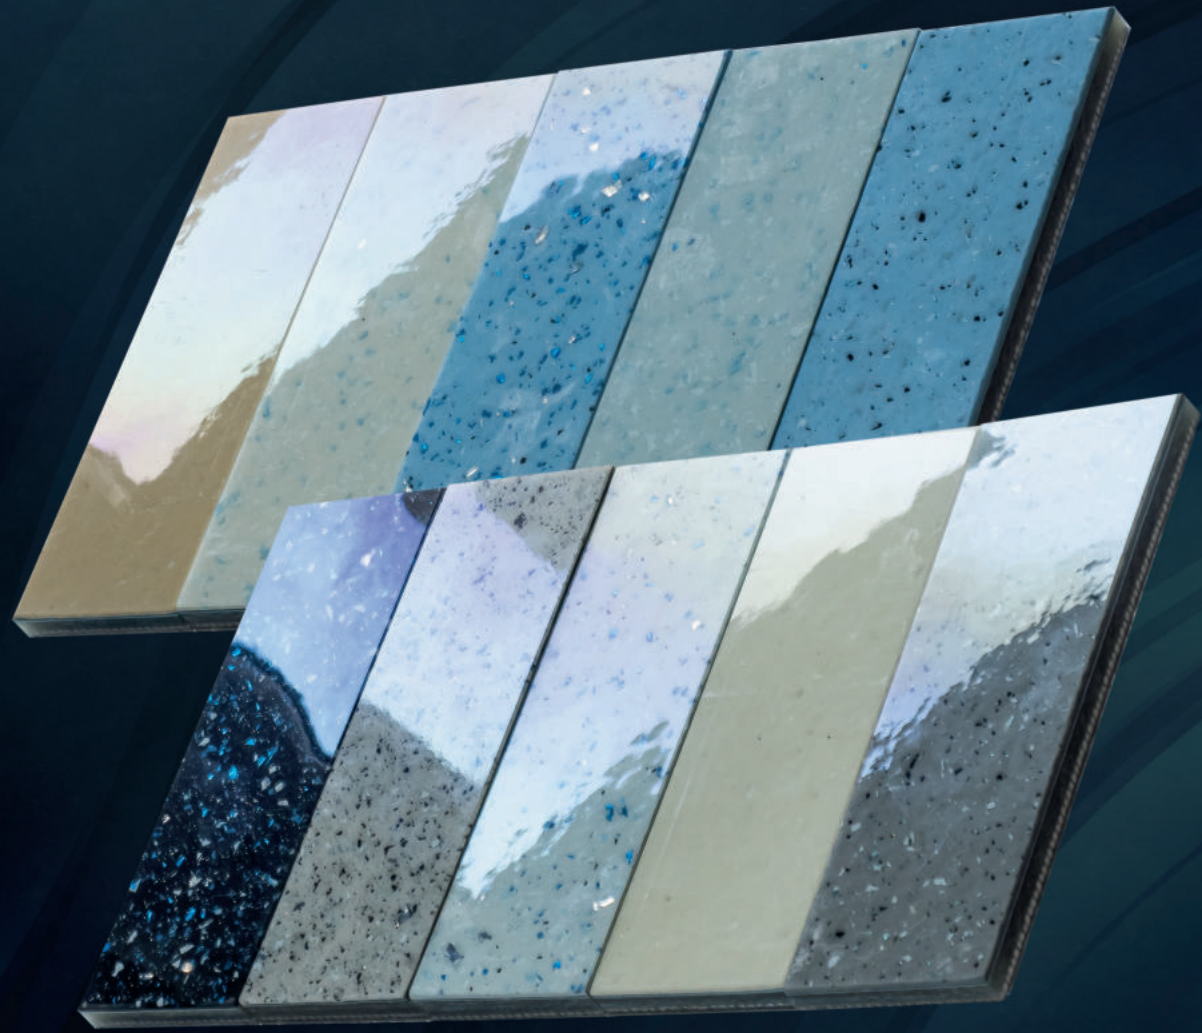

A CROSS-SECTION OF A CRYSTAL VINYL POOL

Our technicians combined the layers in a way that no other company had used before. Eleven layers were fused into a material of unparalleled durability and unique design.

1. Crystal Vinyl Coat™ – an innovative layer of crystal gelcoat based on vinylester
2. Vinylester chip with glitter
3. Base gelcoat – gives color to the pool and protects the basin against osmosis
4. BarrierCoat – vinylester layer based on gelcoat, protecting the structural part against osmosis
5. Vinylester layer – vinylester resin with a glass mat protecting the basin against osmosis
6. Construction layer – glass mat and resin which give the pool durability
7. CoreMat – a material made from glass mat, the layer which is stronger than five layers of standard laminate
8. Construction layer – glass mat and resin which give the pool durability
9. Steel reinforcement
10. TopCoat – protection of the structural layer against external waters (i.e. groundwater)
11. Polyurethane foam – insulation of the pool, which reduces heat loss
